PROFESSIONAL SUMMARY

Full Stack Developer with 2.5 years of experience, centered on migrating a B2B retirement-plan advisory SaaS platform (Perseptiv, ~500 users) from a legacy Node.js/Express.js/Bootstrap stack to FastAPI, SvelteKit, and PostgreSQL. Built REST APIs, role-based authentication, and multi-provider LLM integrations (Claude, Gemini, OpenAI) across the full stack.

SKILLS

Frontend: Svelte, SvelteKit, Svelte 5 Runes, React, JavaScript, TypeScript, Tailwind CSS, shadcn-svelte, HTML5, CSS3, Responsive Design, Accessibility

Backend: Python, FastAPI, Node.js, Express.js, REST API Design, Pydantic, SQLAlchemy, Async Programming, JWT and Session Authentication, RBAC, Rate Limiting

Database: PostgreSQL, MongoDB, SQL, Schema Design, Database Migrations, JSONB, Multi-Tenant Data Modeling

AI / APIs: Claude API, LiteLLM, Gemini API, OpenAI API, Multi-Provider LLM Integration, Prompt Engineering, Document Extraction

Testing: Pytest, Vitest, Unit Testing, Integration Testing, API Testing

Tools and Practices: Git, GitHub, Cursor, VS Code, Postman, Vercel, Netlify, pnpm, uv, Pre-commit Hooks, Code Review, Technical Documentation

PROFESSIONAL EXPERIENCE

Full Stack Developer, Slashash Tech LLP Mar 2024 - Sep 2026 | India

Svelte, SvelteKit, Python, FastAPI, PostgreSQL, Tailwind, shadcn-svelte

- Migrated core modules of Perseptiv, a B2B retirement-plan advisory SaaS serving ~500 users, from a legacy Node.js/Express.js/Bootstrap stack to FastAPI, SvelteKit, and PostgreSQL, contributing over 1,600 commits across a 180-router, 1,500+ endpoint backend and a 240-page frontend.
- Developed REST APIs for a 32-feature backend (RFP lifecycle, plan design, vendor management, benchmarking) on FastAPI and PostgreSQL, working within a 258-table schema that includes JSONB-based fee modeling.
- Implemented session-based authentication with server-issued JWTs and a two-layer role-based access control system enforcing over 100 distinct permission checks across tenants.
- Integrated multi-provider LLM features via LiteLLM, including Claude and Gemini models, into 11 product areas such as RFP analysis and due-diligence document extraction, including the prompt templates behind them.
- Built 240+ SvelteKit pages and 400+ reusable components with Tailwind CSS and shadcn-svelte across 44 feature areas of the application.
- Wrote SQL migration, backfill, and diagnostic scripts for PostgreSQL schema and data fixes, with 135 script updates kept reproducible across environments.
- Tested backend services and frontend logic with Pytest and Vitest across a suite of 355 backend test files covering permissions, tenant isolation, and regressions.

PROJECTS

AlgoLens AI - AI-Powered DSA Learning Platform Live: algolens-ai.vercel.app

SvelteKit, FastAPI, Python, PostgreSQL (Aiven), Gemini API, Tailwind

- Built a full-stack learning platform with structured topic notes, practice problems, AI explanations, code review, and spaced-repetition revision.
- Engineered a FastAPI and PostgreSQL backend with Google Gemini integration, validating and caching all AI output to ensure reliability and control API cost.
- Implemented secure JWT authentication, protected pages, and progress tracking in a modern SvelteKit dashboard.

AI Code Review Tool github.com/geeteshmehuria/devreview-ai

SvelteKit, FastAPI, Python, Gemini API, Tailwind

- Built an AI developer tool that reviews pasted or uploaded code and returns structured feedback.
- Identified and isolated bugs, code-quality issues, security concerns, and refactoring suggestions through careful prompt design and backend API handling.

Chefbot - AI Recipe Generator

React, TypeScript, Node.js, Express.js, MongoDB, OpenAI, DeepAI

- Full-stack MERN app integrating the OpenAI and DeepAI APIs for AI-driven recipe discovery and generation.

EDUCATION

Full Stack Web Development, Masai School, Bangalore — Jul 2023 - Apr 2024

MBA (IT and HR), Dr. A.P.J. Abdul Kalam Technical University — Sep 2021 - Jun 2023

B.E., Electronics and Communication, Rajiv Gandhi Proudyogiki Vishwavidyalaya — Aug 2016 - Oct 2020
